

# BWB BIO Flame Photometer

The BWB BIO has been created for measuring biological solutions and is modernized for today's research work; which requires routine, quick measurements, with high levels of accuracy for Lithium, Calcium, Sodium and Potassium elements.

## Features

- Specially configured for a range of user interests
- Single point calibration correction
- Internal reference standards
- 5 and 6 point multi-ion calibration standards for urine and serum included
- Analysing Li and Ca along with Na and K

Technologies

*Just Add Gas*
